ACQUAPH digital water ionizer.

Feel better & Live Longer Alkaline Water Hydrogen Water Filtration System

A SMALL CHANGE TO FREQUENTLY DRINK

GOOD WATER

BECOMES THE START TO MANAGING

GOOD HEALTH!

 \sim Alkali Water \sim Purified Water \sim Acidic Water \sim

4 beneficial effects approved by Food & Drug Administration Assists in improvement of chronic dysentery, hyperacid and lactic acid in stomach

Alkaline Water Features

Alkali water usage purpose approved by Food & Drug Administration

The device produces alkali hydrogen water exceeding pH8.5 ti 10.0 by electrolysis of drinking water and medical device that produces alkali water of hydrogen ion concentration (pH) of 9.5 for drinking purposes that help stomach problems.

Characteristic of Alkali Water

There are plenty of reducing power and active hydrogen that affect positively body's bio-rtythm.

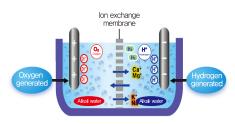

- Absorbs easily due to small size of water molecule groups (54hz).
- Plenty of active mineral (Minerals in ionized state).
- · It is alkali pH.
- · Has reducing power.
- Plenty of active hydrogen.

Creation of Alkali Water

▲ When cooking

for cooking fish.

Effects of knowing and using water helps the health of our family.

(Alkali water creation principle)

- When drinking coffee, tea Eliminates better the taste of coffee and sour taste of tea, while reviving the original taste and smell of tea. Is especially good when used as water/ice
- Drinking water for baby and powdered formula. It is good to feed the baby with powdered formula mixed with alkali hydrogen water.

for whiskey on the rocks.

♦ When using as water for washing fruit and vegetables

70% OF OUR BODIES

Purpose of acidic water
Whashing of food supplies, for
smoothness and elasticity of the
skin.

When using a boiling water for stew or soup,

taste of the entire meal is enhanced through

good brewing of ingredients and soup taste

and is especially good when used as water

When using as water for cooking rice

and can be stored for a long time.

If rice is soakedin alkali water for 30-60

minutes prior to being cooked, it shines like

glutinous rice with good taste and no smell

- Used for sterilization of food supplies It is good for washing or sterilizing food supplies such a knife, cutting board, bowl, dish, cloth, etc.
- Used as beauty water Used as water to wash your face (Body's skin is slightly acidic). Acidic water has converging function that makes the skin smooth and elastic. Washing your hair after you have used acidic water makees them look more shiny.

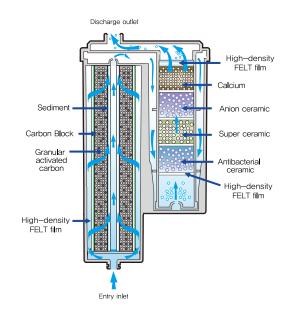

Product name	Water Ionizer	Washing method	Duble Auto Cross Line System
Product approval	No. 05-356	Electrode specification	Platinum titanium
Usage voltage	AC 120V, AC220~230V, 50/60Hz	specification	
Power consumption	120W	Filter exchange method	Cartridge exchange method
Weight	About 6Kg	Filter use	Multi-layer filter 8 months
Body size	360(H) X 284(W) X 136(D)mm	period	May change depending on water quality.
Usable water pressure	1∼7Kg/cm²	Filter exchange display	Voice system and LED bar display
Operation method	One touch panel, LED Display	Filter make—up	10 multi-layer filter method
Power cord length	2M	Overheat protection device	Temperature sensor, bi-metal inside
Electrolysis method	Continuous electrolysis method (10 minutes)	Water supply method	Direct connection to waterworks
Electrolysis concentration setting	Alkali water 4 levels, acidic water 2 levels, Purified water	Creation quantity	Maximum 31 /min

Patented multi-layer filter structure

By installing high-performance multi-layer filter with patented know-how exclusive acquaPH, you can use, clean water safetly. Filter Lifespan: 8 months

Category	Material Name	Category	Material Name
Filter Part PART(I)	① High-density ① FELT Film	Active Water Part PART(II)	⑤ High-density FELT film
			Antibacterial ceramic
	② Carbon block filter		⑦ Super ceramic
	3 Granule activated carbon filter		Anion ceramic
	Sediment filter		Salcium (chloride removal bowl)
			10 High-density FELT film

^{*} Filter lifespan may vary depending on source water.

ACQUAPH Ionizer WATER SYSTEM'S CHARACTERISTICS

State-of-the-art, automatic system consisting of high-performance multi-layer and convenient voice system.

- Maximized convenience by voice system and melody application
- Application of 4 volume level setting function
- Filter exchange timing warning function and enhance convenience by applying voice system
- User history checking function by applying user mode and administrator mode function
- Improve operation convenience by aplying automatic valve (solenoid value) and application of stable pH concentration maintenance system
- Application of alkali water automatic restoration system to prevent drinking of acid water
- Application of automatic stop timer(automatically stop after 10 minutes: water overflow prevention function)
- Application of ON-TOUCH ON/OF function

- Maximize durability by application of DoubleAuto Cross Line System
- Enhance stability by application of patented high-performance 10-stagemulti-layer filter
- By applying 4 levels of alkali, 1 level of filter, and 2 levels of acid water, the system creates various ion water
- Selecting water quantity (water detection) sensor for application optimal water quantity setting and water quantity display system
- Design for safe usage through application of various leveles of safety devices
- Application of water quality selection function
